

ARTHUR SANTOS NETO

Senior .NET Developer | Backend/Full Stack | Software Architecture

Lages - SC - Brazil | +55 49 92003-9560 | arthursan.neto@gmail.com

linkedin.com/in/arthursan-neto | github.com/Arthur-Neto

PROFESSIONAL SUMMARY

Senior .NET Developer with 5+ years of experience in backend and full-stack development, including technical leadership of projects and development teams. Specialized in .NET Core/.NET Framework, Entity Framework, SQL Server, and software architecture for high-complexity systems. Proven track record in system design, CI/CD, performance optimization, and technical mentoring. Over the past few months, has focused on studying and applying generative AI tools in software development (GitHub Copilot, Google Antigravity), incorporating these skills into the workflow for productivity gains. Focused on code quality, automated testing, and software engineering best practices. Seeking a remote or hybrid opportunity as a Senior or Mid-level Developer.

Stack: .NET Core / .NET 6/7/8 · Entity Framework · SQL Server · Azure DevOps · AWS · REST APIs · Angular · Unit Testing · Git · Generative AI applied to development

PROFESSIONAL EXPERIENCE

Independent Developer — Generative AI Studies and Projects

Mar 2025 – Present (1 year 5 months) | Lages, SC

Period dedicated to deepening expertise in generative AI tools applied to the software development lifecycle, focusing on productivity, rapid prototyping, and new paradigms for working with AI agents.

- Development of personal projects supported by GitHub Copilot and, more recently, Google Antigravity, including a browser extension, landing pages, and full websites with a C# backend
- Ongoing study of AI agents for software development (Hermes)
- Rapid prototyping and idea validation, applying generative AI across all stages: planning, coding, testing, and documentation
- Continuous tracking of new AI-assisted development tools and practices

Stack: C#, .NET, Angular, GitHub Copilot, Google Antigravity, Hermes (in progress)

Senior Software Developer — Positivo Tecnologia

Oct 2023 – Mar 2025 (1 year 6 months) | Curitiba, PR (Remote)

Development and maintenance of critical features for Aprende Brasil, an educational platform used by 2,800+ municipal school units and 438,000 students. Worked across multiple systems in the product ecosystem, including .NET applications (legacy and new modules), React, and PHP/Laravel.

- Architected and developed new features in .NET 7, Entity Framework with SQL Server
- Implemented a feature in a React application used by teachers to grade exams via image reading and image-based markup
- Implemented an authentication mechanism for a PHP/Laravel application that previously had no login system, including manual deployment to a Linux VM (first hands-on experience with Linux deployment), resolving PHP module dependencies and coordinating with the infrastructure team to whitelist IPs required for the application's external integrations
- Maintained and tuned SQL Server stored procedures and views for report and query optimization
- Infrastructure migration: consolidated repositories from AWS to Azure DevOps, building CI/CD pipelines (reduced build time from 15 min to 5 min)
- Optimized SQL queries and application performance, improving response time by 40%
- Production monitoring and support with Application Insights, managing multi-environment deployments
- Code review, unit testing, and technical guidance for the team

Stack: .NET 7, .NET Framework, Entity Framework, SQL Server, Azure DevOps, AWS CodeCommit, Angular, React, PHP, Laravel, Git, Hangfire

Independent Developer — Studies and Projects

Mar 2023 – Oct 2023 (8 months) | Lages, SC

Period dedicated to studies and development of personal projects, focused on Angular, C#, and application architecture.

- Development of .NET Core + Angular projects focused on design patterns and scalability
- Advanced studies in software architecture, SOLID principles, and design patterns
- Integration with external APIs and testing of new technologies

Stack: .NET Core, Angular, Entity Framework, SQL Server

Senior Software Developer (Sunbird) — PrintWayy

May 2021 – Mar 2023 (1 year 9 months) | Remote

Technical leadership and development of Sunbird, a printer ticketing and management platform for businesses. Responsible for software architecture, technical decisions, and development team management.

- Architected and developed a full-stack printer ticketing system in .NET 6
- Implemented Identity Server with OpenIddict for authentication and authorization
- Designed a multi-tenant architecture with a per-client SQL Server database, including dynamic routing logic to identify and connect to the correct database based on the authenticated user
- Built custom frontend components using Angular and Telerik Kendo UI
- Provided technical leadership for a 6-8 developer team: code review, technical interviews, and mentoring
- CI/CD with Azure DevOps across multiple environments (dev, staging, production)
- Production monitoring with Application Insights and implementation of structured logging
- Implemented Hangfire for asynchronous background task processing

Stack: .NET 6, Identity Server, OpenIddict, Hangfire, Entity Framework, SQL Server, Azure (DevOps, Insights), Angular 13, Kendo UI, Elasticsearch, Git

Software Developer — PrintWayy (Dragon System)

Nov 2020 – May 2021 (7 months) | Remote

Feature development and technical support for Dragon, a legacy printer management platform built on ASP.NET MVC.

- Full-stack development in ASP.NET MVC 4, integrating SQL Server, Redis, and Cosmos DB
- Built custom frontend components using Telerik Kendo UI with Razor Pages
- Custom stopwatch-based instrumentation to diagnose critical paths, identifying CosmosDB bottlenecks that reduced load times on critical pages from over 1 minute to 20-30 seconds

Stack: ASP.NET MVC 4, Entity Framework, SQL Server, Cosmos DB, Redis, Kendo UI, Razor Pages, Azure DevOps, Git

Mid-Level Software Developer — NDD (nnd Print 360)

Oct 2018 – Nov 2020 (2 years 2 months) | Lages, SC

Development of the nnd Print 360 corporate portal, a printer management system, applying DDD, SOLID, and automated testing.

- Full-stack development (.NET Core/.NET Framework), applying DDD, SOLID, and Clean Code
- Automated testing (xUnit, NUnit, Moq, Selenium) and CI/CD with TFS, Azure DevOps, and PowerShell
- Built custom frontend components using Telerik Kendo UI with Angular
- Developed an MSI installer with WixSharp, including multi-language support (PT/EN/ES); contributed to the open-source project by filing GitHub issues
- Conducted a technical study evaluating migration of a custom reporting system to SQL Server Analysis Services (SSAS), including ETL analysis

Stack: .NET Framework, .NET Core, Entity Framework, SignalR, Hangfire, SQL Server, SSAS, WixSharp, Angular, Kendo UI, Git

Trainee Developer — NDD

Feb 2018 – Oct 2018 (9 months) | Brazil

Technical training program in backend (.NET Framework) and frontend (Angular) development: RESTful APIs, Entity Framework, N-Tier pattern, and unit testing with NUnit.

Stack: .NET Framework, Entity Framework, Angular, SQL Server

EDUCATION

Bachelor's Degree in Computer Science

Federal Institute of Santa Catarina (IFSC) | 2015 – 2019

Capstone Project: Academic Term Paper Management System (.NET Core)

Technical Degree in IT Development

Federal Institute of Santa Catarina (IFSC) | 2012 – 2014

TECHNICAL SKILLS

Languages: C#, JavaScript, SQL, PHP

Frameworks/Libraries: .NET Core, .NET 6/7/8, .NET Framework, Entity Framework, ASP.NET MVC, Hangfire, SignalR, Angular, React, Laravel, Kendo UI, WixSharp

Databases: SQL Server, SSAS, PostgreSQL, LiteDB, Cosmos DB, Redis (caching)

Tools/Platforms: Azure DevOps, AWS (EC2, S3, Beanstalk, CodeCommit), Git, Postman, Linux VMs

Patterns & Practices: REST APIs, SOLID principles, DDD, Clean Code, Design Patterns, CI/CD, Unit Testing, Code Review

Generative AI applied to development: GitHub Copilot, Google Antigravity, studying AI agents (Hermes)

Languages (spoken): Portuguese (Native) | English (Advanced - C1 EF SET 64/100)

CERTIFICATIONS

- Microsoft Exam 483: Programming in C#
- EF SET English Certificate — 64/100 (C1 Proficient)

FEATURED PROJECTS

Repository of Term Papers (2019) — Academic term paper management and search system built with .NET Core, Entity Framework, and SQL Server. Implemented full-text search and performance optimizations.

Generative AI Projects (2023–present) — Series of personal projects built with the support of AI tools (GitHub Copilot, Google Antigravity), including a browser extension, landing pages, and full websites with a C# backend.
